The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '121.

EP '121 discloses rubber compositions suitable for the production of tire treads. These compositions are taught as comprising olefinically unsaturated rubbers, styrenic polymers in amounts such as claimed instantly and triethoxysilylpropyl tetrasulfide. This last component is seen as meeting the limitations of the formula of instant claim 6. The styrenic polymers are seen as high impact polymers and are taught as modified with polybutadiene.

Therefore, the reference anticipates the rejected claims.
